- <http://www.lispcast.com/uncategorized/episode-1-humble-beginnings-2/>
- <http://www.lispcast.com/files/episode1/reddit-lisp.lisp>

Supported Features

- HTTP/1.1 chunking (both directions)
- File upload/download
- Sessions, Persistent Connections
- Security
- SSL
- Cookies
- Client Get/Post parameters

Program Interface

```
(hunchentoot:define-easy-handler (say-yo :uri "/yo") (name)
```

```
  (setf (hunchentoot:content-type*) "text/plain")
```

```
  (format nil "Hey~@[ ~A~]!" name))
```

My Experience

- About 3 hours so far ...
- Downloaded and got it running test pages in about 10 minutes (!)
- Copied simple handler and got it running in < 5 minutes.
- Copied reddit example, downloaded utilities it depended on, fixed outdated code, fixed how it looked: about 1/2 hour.
